There will be an Eclipſe of the Moone, the xxvi day of Januarie, a little after vi a clock in the moꝛning.

Diuers necessarie elections, concerning Physicke and Chyrurgerie

IF any of the foure naturall powers, seruing for nutrition be weakened, and so not able to do their proper office and duetie, for the amending and strengthening thereof, the course and motion of the Moone vnder the xii. celestiall signes of the Zodiake, would be duly considered.

The Moone being well affected in

- Fierie signes. Aries and Sagittari. — The vertue is best comforted, for it worketh with heate and drinesse.
- Earthy signes. Taurus & Virgo — The vertue is most strengthened, for it worketh with colde and drinesse.
- Ayrie signes. Gemini first halfe of Libra & Aquarius. — The vertue best comforted, for it worketh with temperate heat and moystnesse.
- Watery signes. Cancer last halfe of Scorpio and Pisces. — The vertue is best repayred, for it worketh with colde and moystnesse.

Note that from the change of the Moone to the first quarter, and from the full to the second quarter, the humors do moue from the internall parts, to the outward members; as contrarywise, from the first quarter to the full, and from the second quarter to the change, they are caryed by a diuers motion, from the

the outward members to the inward parts of the body.

In the first and third weekes of the , it is best vsing externall euacuations, as Phlebotomie, Bathes, Cupping, &c. But in the second and fourth weekes of the internall euacuations, or purging medicines, are ministred with best successe.

If the weather is very hotte, or very colde, it is extreamely dangerous eyther to purge or let blood, vnlesse present and vrgent necessitie require the same, as the onely most present and speedie remedie.

In any humor, when the is in an ayrie signe, as namely in Gemini, the first halfe of Libra or in Aquary.

is best taken, the being in a watrie signe.

{Electuaries. / Potions. / Pylles.} in {Cancer. / Scorpius. / Pisces.}

is generally to bee commended, when the is well affected in Cancer Aquarius or Pisces. but in any wise by counsell and consent of some good and expert Phisition.

For health the being in Aries, Leo, Sagitarius: and for cleanlines she being in Libra, or Pisces.

or plaster, is best applied, when the is in that signe which gouerneth the same member to which it is applicable. But for the amendment of any defect or want, curable and supplicable by the vse and application of the same, it is farre otherwise: for in such a case must be remembred, that it is very dangerous, and extreame perillous, to open a vaine, or to make any notable incision, or cauterization in any member, when the is resident in that signe which ruleth the same member,

Good remembrances for setting, sowing, Planting, Grafting, felling of Timber, cropping of trees and sheering of Sheepe, gelding of Cattell, &c. very necessarie for all men.

The best and most prosperous times, to set, sowe, Plant, and Graffe, the moneth or season duly considered is, when the hath her course in Taurus Virgo, or Capricornus especially betweene the change and the full.

Fell Timber to builde withall, towardes the end of the last quarter, she being then in Aquarius or Pisces.

Crop Trees and fell Wood to burne, that the stocke may the better and sooner grow againe when the is in her first quarter.

Remoue and set young Trees, in the last quarter of the in Taurus Capricornus, and that in the Monthes of September, October Nouember and Februarie.

Cut or prune Vines in Februaay or March, at the encrease of the she being in Taurus, Virgo or Libra.

Geld or Libbe Beastes or Cattle, the in Aries, Sagittarius or Capricornus, in the wane thereof.

Sheere Sheepe, from the change of the to the full.

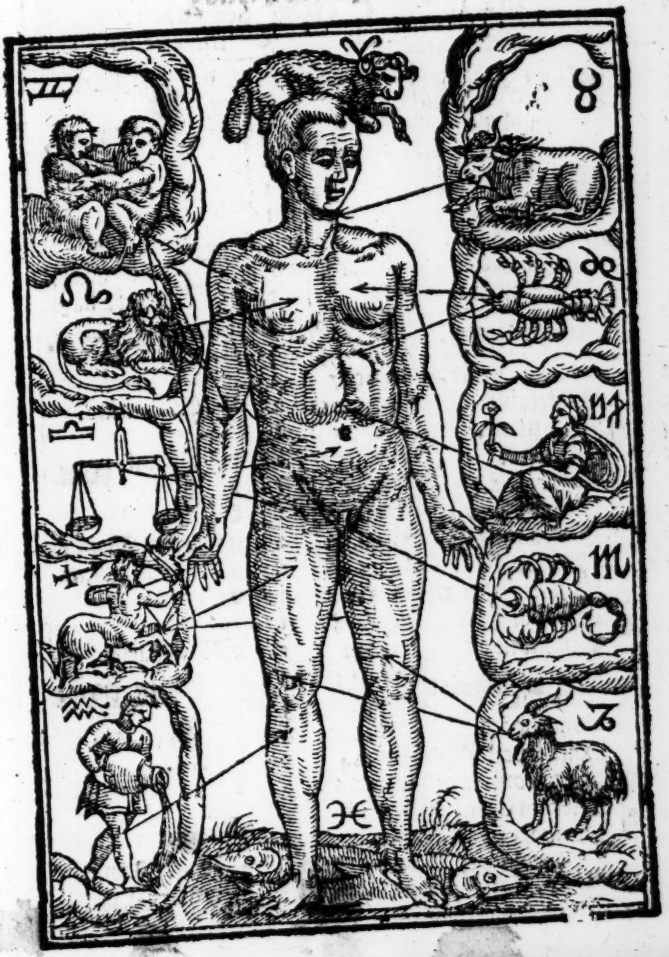

Cut of hayre head & beard, the in Libra Sagittarius Aquarius, or Pisces, especially from the first quarter, to the full

This ſeaſon is enclinably cold and moyſt, anſwering to the complexion of old men, and agreeable to the Element of water.

Of the Spring. Sun in ♈ ♉ ♊.

THis Spring begineth the xi. day of March, being ſunday. The Sunne then entering into the Equinoctiall ſigne Aries, and ryſing at vi. a clocke in the morning, and ſetting at vi. in the euening. The day and night being then equall in length. This quarter is hotte and moyſt, reſembling the Sanguine complexion, and the ayrie Element.

Of Summer.

SUmmer beginneth the xii. day of June, when the Sunne entereth into Cancer, making the Eſtuall or Summer Solſtice, to wyt, the longeſt day, and ſhorteſt night in the whole yeere, for now the ſunne ryſeth neare three a clock and ſetteth about eight. Of Harueſt.

THe Harueſt quarter, called alſo Autumn, is ſaid to begin the xiii. of September, for that the ſunne entreth into
